

Bod&pen System

It's like having a computer at the crime scene, without the hassle.

Bod&pen System

The Bod&pen is designed to capture hand written notes, sketches or completed forms. It uploads the written information into the host computer, as an electronic PDF format, for document filing or emailing without scanning or retyping.

Specifications

The Bod&pen System consists of a digital writing pen with carbon free ink, client customized Bod&paper and a cradle to dock the pen with USB-powered connector to the host computer, which is preloaded with the provided support software.

Product Features

Customizable

The Bod&pen System offers applications that work for any purpose. The system records any type of information, from sketches to note taking to report writing.

With the option of customized forms any process can become more efficient and record keeping is made easy. Design a form for any application and Bode can provide a preprinted form that will be recognized by the pen.

Simple

The system offers simple one-click options for saving, printing, e-mailing, and previewing.

Auditable Data

The Bod&pen System offers authentic and auditable information by requiring pen and paper registration and time-stamping a document when written. Everything results in easily accessible and reviewable PDF files.

Compatible

The Bod&pen System is compatible with most operating systems including Microsoft® Windows 2000 and Windows XP.

The Bod&pen System is also compatible with most email applications including Microsoft® Outlook®, Microsoft® Hotmail®, and AOL 8.0 and above.

Frequently Asked Questions

Can a pen be used on multiple forms?

- Yes.

Can multiple pens be used on one form?

- Yes.

Can a pen add ink later to update a form?

- Yes.

Can different users share a form?

- Yes, if downloading as the same BodEpen System user.

What is the pen's warranty?

- Two years

Can different users on different computers share a form?

- No. All BodEpen System files are stored explicitly in the system user's own folders.

Does the pen record when writing on normal paper (paper without dots)?

- No, but it still can be used as a normal pen.

How do I recharge the pen?

- It recharges when it's placed in the docking cradle.
